Public Employment Opportunity

Computer Programmer/Analyst

Permanent

Information Management Division
St. John’s, NL

DUTIES: Reporting to the Director of Information Management, this position provides support for the information and business needs of the Provincial Information and Library Resources Board. The position provides analysis and programming on small to mid-scale production systems. The incumbent understands the business needs and problems of the organization and recommends, defines and implements appropriate solutions to resolve these problems. The position is responsible for: request processing and the quality control, maintenance, support and administration of production systems; working closely with the IM team to determine scope of requested modifications, defining requirements, and developing time and cost estimates; ensuring that enhancements and modifications are correct and adhere to standards; ensuring that all unit and system testing is adequate and reviewed with the user; writing and modifying small to medium computer programs, as required; preparing program specifications, operation instructions, implementation schedules, test plans and user guides as part of the process of delivering modifications and enhancements; investigating and correcting production problems for various applications; working within a fast-paced environment and reporting regularly on status to the Team Lead or Director; and other related computer support duties as required.

QUALIFICATIONS: Candidates must demonstrate knowledge and experience with Systems Development Life Cycles, including the support and enhancement of production applications in a client-focused environment. Candidates must have knowledge and experience using a wide range of programming languages including MySQL/SQL, PHP 5, Javascript, Jquery, CSS, HTML. A good working knowledge of MS SQL, PHP Frameworks, Bootstrap Framework, HTML5 and Open Source Content Management Systems would be an asset. In addition, the successful candidate will display effective analytical, communication, interpersonal and organizational skills to complement a proven ability to work in both independent and team based environments. Experience with formal Incident/Change Management practices, data protection practices will be considered assets. These qualifications would generally be acquired through graduation with a degree or diploma from an approved college or university with major course work in Information Technology supplemented by related experience of a progressively responsible nature in a multiplatform application environment. Equivalencies may be considered. Must have a valid driver’s license. Candidates will be required to provide a clear Criminal Records Check, including a Vulnerable Sector Check.
NO. OF HOURS: 35 regular hours per week
CLOSING DATE: August 3, 2016
COMPETITION #: PILRB-CPA-16-08
