Deadline to Apply: May 23, 2019

PUBLIC POSTING

Job Information – Instructional Assistant

DUTIES: As the primary member of the instructional team, you will be responsible for the development of learning resources required to support the delivery of courses included in the Geological Technician Program. You will establish student performance objectives and evaluation methods, as well as assist with the identification of off-site resources and equipment to support program delivery. Once program delivery begins, your primary assignment will be to provide instruction and evaluate student progress by planning, organizing, and managing learning activities and lab/field equipment in both classroom and lab/field settings. You will prepare and implement various instructional strategies, techniques, and learning models to achieve specified learning outcomes and meet course objectives. You will be expected to communicate effectively at a level appropriate to the ability of students and support an emotionally safe learning environment that is conducive to learning by maintaining appropriate classroom discipline following College policies and procedures. As the successful candidate, you will keep course portfolio documents required for accreditation processes and engage in instructional and program development/improvement plans and are expected to contribute to professional and community life within the College and beyond, as well as perform other related duties that contribute to a quality student-centred environment. The successful candidate will play a pivotal role in coordinating partnership arrangements including linkages with other educational institutions, government agencies and other industry stakeholders critical for the success of this program.

QUALIFICATIONS: The successful candidate must possess broad knowledge and experience within the Geological field with substantial mineral exploration experience. An understanding of current teaching/learning methods and classroom management is also required. Well-developed communication, analytical, conflict resolution, and organizational skills, as well as the ability to work independently and as part of a collaborative team while establishing and maintaining effective working relationships in a teaching environment are essential. You must also have a strong commitment to student success strategies and initiatives. The required knowledge and skills would normally have been acquired through the completion of a Bachelor of Science (Earth Science) Degree with a Geology concentration or equivalent degree with concentration in area of instruction, supplemented with at least four years recent, related industry experience. A Bachelor of Education (Post-Secondary or Secondary), designation as a Professional Geoscientist (P. Geo), and teaching experience at the post-secondary level would be considered assets. The successful candidate will be required to obtain a Class IV Driver's License.

SALARY: Commensurate with qualifications and experience in accordance with the College of the North Atlantic Faculty Collective Agreement.

College of the North Atlantic is an Equal Opportunity Employer.

The successful candidate will be required to provide a recent Certificate of Conduct.

Please apply on line complete with resume at www.cna.nl.ca. Names of three professional references will be required as part of the interview process.

Candidates must clearly demonstrate in their resume that they meet all of the required qualifications. Failure to do so may result in a candidate being screened out of the competition.
