Instructor - Computer Systems Engineering Technology
Location: Ridge Road Campus – St. John's
Job Opening ID: 10599
Permanent, Full-Time
Commencing: August 27, 2019
Deadline to Apply: July 24, 2019

INTERNAL POSTING

DUTIES: The primary assignment of the successful candidate will be to instruct students, facilitate learning and evaluate student progress in the Computer Systems and Networking Program. The instructor will incorporate their own teaching style to existing lesson plans while meeting the learning objectives of the course material; work with other faculty members to maintain a coordinated and consistent teaching approach to ensure the planned curriculum for each course is delivered; prepare and implement various instructional strategies, techniques, and learning models using an approved curriculum to achieve specified learning outcomes; establish student performance objectives and evaluation methods; meet with students regularly to gauge and evaluate progress; communicate effectively at a level appropriate to the ability of students and support an emotionally safe learning environment that is conducive to learning; maintain appropriate classroom discipline following College policies and procedures; identify and resolve problem areas in teaching and learning; provide academic advising to students; participate in professional development activities to remain current in your field and post-secondary education profession; and actively participate in and contribute to accreditation activities to ensure the program is of the highest standard. Specific areas of instruction may include any courses from the Computing Systems Engineering Technology Program. As the successful candidate, you are expected to contribute to professional and community life within the College and beyond, as well as perform other related duties that contribute to a quality learner centred environment.

QUALIFICATIONS: The successful candidate must possess a working knowledge of the theory and technical procedures within the computing systems engineering technology field with emphasis on object-oriented programming, databases, networking, and modern web technologies. An understanding of current teaching/learning methods and classroom management is also required. Well-developed communication, analytical, conflict resolution, and organizational skills, as well as the ability to work independently and as part of a collaborative team while establishing and maintaining effective working relationships in a teaching environment are essential. You must also have a strong commitment to student success strategies and initiatives. The required knowledge and skills would have been acquired through the completion of a Bachelor of Engineering (Electrical) Degree with specialization in area of instruction plus two years recent, relevant industry experience. Alternatively, a Diploma in Computing Systems Engineering Technology

supplemented with a Bachelor of Technology Degree or a Bachelor of Engineering Technology Degree with concentration in area of instruction plus four years recent and relevant experience will also be considered.

SALARY: Commensurate with qualifications and experience in accordance with the College of the North Atlantic Faculty Collective Agreement.

College of the North Atlantic is an Equal Opportunity Employer

The successful candidate will be required to provide a recent Certificate of Conduct.

Please apply on line complete with resume at www.cna.nl.ca. Names of three professional references as well as original transcripts will be required as part of the interview process.

Candidates must clearly demonstrate in their resume that they meet all of the required qualifications. Failure to do so may result in a candidate being screened out of the competition.
