

Department of Transportation and Works

FALL PLACEMENT- 1 Position Work term 1 through 6
Government of Newfoundland and Labrador
Engineering Division, Grand Falls-Windsor, NL
Engineering Co-op Student

The Engineering Division of the Department of Transportation and Works provides engineering design services, contract implementation and supervision and associated functions related to the design, construction and rehabilitation of highways and associated structures.

You will assist Regional staff with the preparation of tender documents for Capital Work and assist staff with contract administration on Capital Projects involving construction, upgrading and rehabilitation of highways and associated structures. Depending on the nature of the project, duties may include surveying, sieve analysis, concrete testing, drafting and quantity calculations. Your headquarters will be at the Grand Falls/Windsor Regional Office; however, travel throughout the region may be required.

You will be expected to perform work as part of a team as well as work independently when required. You must also possess effective organizational, analytical, and communication skills and must be detail oriented. Please submit a copy of your transcript with your application.

Competition #: SEBF.17.18.002
