

## Department of Transportation and Works

---

**SPRING PLACEMENT- 1 Position Work term 1 through 6  
Government of Newfoundland and Labrador  
Engineering Division, Clarenville (with travel throughout the region), NL  
Engineering Co-op Student**

The Engineering Division of the Department of Transportation and Works provides engineering design services, contract implementation and supervision and associated functions related to the design, construction and rehabilitation of highways and associated structures.

You will assist in all aspects of highway design and construction. Depending on the nature of the projects assigned, duties may include surveying, sieve analysis, concrete testing, and computer aided drafting and quantity calculations.

Headquarters will be at Clarenville Regional Office; however, travel throughout the region may be required.

You will be expected to perform work as part of a team as well as work independently when required. You must also possess effective organizational, analytical and communication skills and will be detail oriented. Please submit a copy of your transcript with your application.

**Competition #: SEBS.18.19.017**
